

SELF-AUDIT STATEMENT - KLIPSPRINGER LTD

Accreditation:

Klipspringer is accredited against ISO 9001/2015.

Site No:	9705
Certificate No.:	9705-QMS-001*
Initial Registration:	07-11-2011
Re-Issue Date:	18-09-2020
Expiry Date:	07-11-2023

Instrumentation:

All instrumentation products are fit for purpose.

All thermometers and loggers are suitable for use within a food or beverage manufacturing facility.

All probes are made from stainless steel, and unless otherwise specified, are suitable for direct contact with food.

Most thermometers and loggers will be supplied with the certificate of conformance, however, please note that this is not a calibration certificate; calibration is available for an additional charge.

Some items, due to their nature, should be used in more controlled environments such as a laboratory or test kitchen to ensure both longevity of use but also to reduce foreign body contamination risks from the instrument.

It is the responsibility of each user to ensure they risk assess each instrument to ensure that any inherent risk is highlighted and reviewed.

Calibration:

Calibration of temperature and humidity devices is conducted on site.

The site is an accredited UKAS calibration laboratory against ISO/IEC 17025/2017, Lab No. 0764 (certificate attached to this document). The current certificate issue date is 27th September 2019 (N.B. this type of certificate has no expiry date).

Both UKAS and Caltrac traceable calibration are available.

Caltrac calibration is available for temperature and humidity devices and test weights. Calibration certificates for the equipment used and traceable to UKAS may be requested.

For UKAS calibration the certificate issued is sufficient evidence that the calibration meets the ISO/IEC 17025:2017 requirements through UKAS regular assessment on site, see Appendix A (page 9) point A6 of [LAB5 V3 Jan 2019](#).

For calibration schedule use [Calibration Scope UKAS 0764](#).

UKAS Certificate of Accreditation:

Certificate of Accreditation

Klipspringer Ltd

Calibration Laboratory No. 0764

**Is accredited in accordance with International Standard ISO/IEC 17025:2017
- General Requirements for the competence of testing and calibration
laboratories.**

This accreditation demonstrates technical competence for a defined scope specified in the schedule to this certificate, and the operation of a management system (refer joint ISO-ILAC-IAF Communiqué dated April 2017). The schedule to this certificate is an essential accreditation document and from time to time may be revised and reissued.

The most recent issue of the schedule of accreditation, which bears the same accreditation number as this certificate, is available from www.ukas.com.

This accreditation is subject to continuing conformity with United Kingdom Accreditation Service requirements.

Matt Gantley, Chief Executive Officer
United Kingdom Accreditation Service

Initial Accreditation: October 6, 2003
Certificate Issued: December 9, 2019

Scan QR Code to
verify

UKAS is appointed as the sole national accreditation body for the UK by The Accreditation Regulations 2009 (SI No 3155/2009) and operates under a Memorandum of Understanding (MoU) with the Department for Business, Energy and Industrial Strategy (BEIS).

Alcumus ISOQAR Certificate of Registration:

Certificate of Registration

This is to certify that the Management System of:

Klipspringer Limited

Unit 20, Farthing Road, Ipswich, Suffolk, IP1 5AP

has been approved by Alcumus ISOQAR and is compliant with the requirements of:

ISO 9001: 2015

Certificate Number:	9705-QMS-001
Initial Registration Date:	07 November 2011
Previous Expiry Date:	07 November 2020
Recertification Date:	19 June 2020
Re-issue Date:	18 September 2020
Current Expiry Date:	07 November 2023

Scope of Registration:

Specialist providers to the food industry of temperature, humidity and quality monitoring devices and colour coded cleaning and production equipment. Klipspringer Ltd is a UKAS accredited laboratory for temperature and humidity calibration.

Signed:
Steve Stubley, Technical Director
(on behalf of Alcumus ISOQAR)

This certificate will remain current subject to the company maintaining its system to the required standard. This will be monitored regularly by Alcumus ISOQAR. Further clarification regarding the scope of this certificate and the applicability of the relevant standards' requirement may be obtained by consulting Alcumus ISOQAR.

Alcumus ISOQAR Limited, Alcumus Certification, Cobra Court, 1 Blackmore Road, Stretford, Manchester M32 0QY.
T: 0161 865 3699 F: 0161 865 3685 E: isoqarenquiries@alcumusgroup.com W: www.alcumusgroup.com/isoqar
This certificate is the property of Alcumus ISOQAR and must be returned on request.

Company Liability Insurance:

TO WHOM IT MAY CONCERN

Our Client - Klipspringer Holdings Ltd and Klipspringer Limited

This is to confirm that the above client holds the following covers through Ryan's.

Employers Liability

Insurer	Travelers Insurance Company Ltd

Organisation Structure:

General Queries

HACCP: As a non-food site, HACCP is not applicable.

Ethical Trading: Sedex Membership number ZC202532931

Quality Management System (QMS): The site operates with a QMS, which is in line with ISO 9001:2015, ISO/IEC 17025:2017.

Klipspringer has a documented quality manual, which outlines the company's policies, procedures and working practices.

The QMS is communicated to all staff and formally trained to those where applicable.

All documents are authorised and carry full version control and are controlled on site, with a register of amendments held.

All documents are accessible to all staff on site via the internal server and can also be accessed off site via the company's intranet 'Pulse', which is fully password protected.

Internal Audits: These are completed against all the requirements of the standards listed above. The frequency of each audit is based on risk assessment. Audits are completed by trained auditors.

All audit findings, both compliant and non-compliant, are recorded and any action required is logged onto the Continuous improvement database, with root cause and corrective action taken recorded and the issue formally reviewed and closed off.

All complaints and customer returns are logged on the Continuous improvement database, with root cause and corrective action taken recorded and the issue formally reviewed and closed off.

Where the issue is down to an error by Klipspringer, we will ensure the error is corrected swiftly with as minimum disruption to our customer as possible.

Where an order or items are to be returned by the customer against a confirmed order, then returns will only be accepted with prior agreement. The customer will be responsible for the cost of returning the item, although collection can be arranged for an additional charge. Only items which are fit for resale can be returned and will be inspected on receipt before any credit is issued. A handling charge may be chargeable, see the terms and conditions.

There is an organisational structure on site, which details job function, reporting lines and nominated deputies for all key roles.

All physical records are legible and genuine and are retained for a minimum of 3 years. Electronic records are kept indefinitely.

Specifications, Declarations of Compliance (food contact products) and Materials Safety Data Sheets are held for the products supplied and can be accessed directly from the Klipspringer website, located below each product description.

For products which are suitable for food contact, Declarations of Compliance can be accessed directly from the Klipspringer website.

For any other requirements, please email compliance@klipspringer.com.

Confectionary may be included with orders for delivery. If a site does not wish to receive these, please formally request this via compliance@klipspringer.com.

Allergens: Allergens are not processed or handled within storage or production areas on site. Regarding the products or services supplied however, allergens may be present within the canteens on site. There are no restrictions to what allergens may be brought on site for use in the canteens. This is not a no nut site. Customer are recommended to clean all items post-delivery and prior to use within food manufacturing or storage areas in line with their site's hygiene procedures.

Halal: To the best of our knowledge the items intended for direct contact with food are suitable for Halal production.

Kosher: To the best of our knowledge the items intended for direct contact with food are suitable for Kosher production.

Vegan: To the best of our knowledge the items intended for direct contact with food are suitable for vegan production.

Traceability: Klipspringer operates a first in first out (FIFO) system of stock control and on that basis can trace orders back to purchase order.

The site conducts a recall test at regular intervals and requires that customers keep their contact details up to date to ensure we are able to contact all or any applicable customers in the event of a recall taking place. There have been no recalls from a customer food safety perspective to date.

Approved Suppliers: Klipspringer operates an approved supplier system, where suppliers complete a self-audit questionnaire (SAQ). The frequency of this is based on risk from the answers given and the type of product or service supplied.

Premises: The company works from a purpose-built unit at our address in Ipswich. The operations on site are regarded as low risk. These processes include sales, accounts, storage, picking, packing, manufacture, assembly, service and calibration.

Glass is present on the site and is deemed a low contamination risk, so therefore no special requirements are made. Glass is not logged on a register and is not routinely inspected.

Metal detection or other foreign body devices are not operated on site.

There are no other operations near the site which would be detrimental to the Klipspringer operations.

The premises are completely fenced, and security is covered by CCTV.

Pest control: This is conducted by a 3rd party, Millennium, and is a monthly contract for rodent control only. We do not have biologist visits. There is no formal screening to doors and windows.

The laboratory is air conditioned to ensure the area runs at a constant temperature and humidity to meet the labs uncertainty budgets for the calibrations performed.

3rd party couriers are used to deliver all orders to customers. Only commercial agreements are in place.

Some packaging methods do include such items as staples, we are working with these suppliers to reduce or eliminate these. In the meantime, customers are requested to ensure their intake areas are aware of this possibility. Sites may however request that no packaging containing staples are supplied, this should be formally requested to compliance@klipspringer.com.

The equipment used on site is maintained as and when required but there is no formal maintenance schedule in place.

All calibration equipment is calibrated at a set frequency, either internally or externally for master devices.

Staff are not required to wear special clothing for their roles. Jewellery including watches are worn within the warehouse and manufacturing areas as contamination risk is deemed low.

A 'clean as you go' process is operated, there is no formal hygiene schedule or cleaning instruction cards in place.

Recycling is operated on site for all waste. Waste is removed from site by licensed waste carriers.

Training: All new staff have induction training completed on their first day.

Job relevant training is conducted on site.

Training records are held for all staff. Competency statements are held for all laboratory staff conducting UKAS calibrations in-line with the requirements of ISO/IEC 17025:2017.

Health and Safety: All staff are made aware of the H&S requirements of the company via their initial induction training.

Radek Tameczka, the Laboratory Manager, also oversees all H&S requirements and is I.O.S.H trained. He can be contacted via radek.tameczka@klipspringer.com.

There have been no RIDDORs in the past 3 years. All accidents are recorded, and root causes identified, with corrective action taken, where possible, to reduce the likelihood of a reoccurrence.

The only sub-contracted work completed at a customer's site is the installation and UKAS calibration of environmental temperature and humidity devices. This company is able to complete any health and safety requirements in advance of the visit and also supply copies of their insurance. These should be requested via service@klipspringer.com.

Quality Policy Statement, PR001 V3

Klipspringer Ltd recognise that the disciplines of Food safety, quality, legality, health & safety, ethical trading and environmental management are an integral part of its management function and is committed to supplying products and services into the Manufacturing industry that meet or exceed these requirements. The Organisation also recognises these as a primary responsibility and as the keys to good business in adopting appropriate quality standards.

We will:

- Comply with all applicable laws and regulations.
- Follow a concept of continuous improvement and make best use of our management resources in all quality matters.
- Communicate our quality objectives and our performance against these objectives throughout the organisation and to interested parties.
- Be committed to ensuring operations, storing and distribution of all our products will not pose a food safety or legality risk to the customer.
- Take due care to ensure that activities are safe for employees, customers, suppliers and any others who come into contact with our work.
- Work closely with our customers and suppliers to establish the highest quality standards.
- Adopt a forward-looking view on future business decisions which may have quality impacts.
- Train our staff in the needs and responsibilities of quality management.
- Ensure as a company that we adhere to ethical and environmental requirements.

To assist the company in achieving its quality requirements we are committed to operating in a manner that sustains registration to the International Quality Standard ISO 9001:2015 and ISO/IEC 17025:2017.

It is the Company's belief that, in operating to these standards, it will meet the requirements of its customers and the wider Industry, as it is committed to ensuring we serve our customers to the best of our ability and offer them the best solution to meet their requirements.

Health and Safety Policy, QPO004 V6

The following is a statement of the company's health and safety policy in accordance with Section 2 of the Health and Safety at Work etc. Act 1974.

It is the policy of Klipspringer to ensure so far as is reasonably practicable, the health, safety and welfare of all employees working for the company and other persons who may be affected by our undertakings.

Klipspringer acknowledges that the key to successful health and safety management requires an effective policy, organisation, and arrangements, which reflect the commitment of senior management. To maintain that commitment, we will continually measure, monitor, and revise where necessary, to ensure that health and safety standards are adequately maintained.

The Director, Health and Safety will implement the company's health and safety policy and recommend any changes to meet new circumstances. Klipspringer recognises that successful health and safety management contributes to successful business performance and will allocate adequate finances and resources to meet these needs.

The management of Klipspringer looks upon the promotion of health and safety measures as a mutual objective for themselves and employees. It is, therefore, the policy of management to do all that is reasonably practicable to prevent personal injury and damage to property. Also, the organisation aims to protect everyone, including visitors and member of the public, insofar as they come into contact with our activities, from any foreseeable hazard or danger.

All employees have duties under the Health and Safety at Work Act 1974 and are informed of their personal responsibilities to take due care of the health and safety of themselves and to ensure that they do not endanger other persons by their acts or omissions. Employees are also informed that they must co-operate with the

organisation in order that it can comply with the legal requirements placed upon it and in the implementation of this policy. Klipspringer will ensure continued consultation with the workforce to enable all viewpoints and recommendations to be discussed at regular intervals.

The organisation will ensure a systematic approach to identifying hazards, assessing the risk, determining suitable and sufficient control measures, and informing employees of the correct procedures needed to maintain a safe working environment. We will provide, so far as is reasonably practicable, safe places and systems of work, safe plant and machinery, safe handling of materials and substances, the provisions of adequate safety equipment and ensure that appropriate information, instructions, training, and supervisions is given.

We regard all health and safety legislation as the minimum standard and expect management to achieve their targets without compromising health and safety.

Signed:

Name: Murray Carlyon

Date: 06-01-2022

Version: 006

Environmental Statement, QPO003 V5

Klipspringer is committed to preventing pollution and to complying with all relevant environmental legislation, regulations and other environmental requirements.

We will regularly evaluate the environmental impact of our activities, products and services and we will take action to continually improve our environmental performance.

It is our policy to:

- Minimise the use of energy, water, and natural resources.
- Minimise waste through prevention, re-use and recycling where possible.
- Dispose of waste safely and legally.
- Avoid the use of hazardous materials, including single use plastics, where practical.
- Work with and encourage our suppliers to be more environmentally aware and responsible.
- Prevent environmental damage and minimise nuisance factors such as noise and air pollution.

Where relevant, we will include environmental objectives, targets and improvement actions that relate to this policy, and we will evaluate progress.

We will implement processes to prevent environmental non-conformities and to ensure that we are prepared to deal with potential environmental emergencies.

This policy will be regularly reviewed and updated to take account of organisational priorities and changes, environmental legislation, and best practice.

Ethical Trading Policy, QPO006 V3

Introduction

Klipspringer Ltd. are committed to Ethical trading with both its Suppliers and Customers. Therefore, we choose to only develop relationships with Suppliers who are aligned with our expectations of ethical trading and operate in line with the ETI baseline core principles as outlined below.

The company expects all of its Directors and Employees to carry out their duties for the business to the highest ethical and socially responsible standards and in line with all relevant legal requirements.

The standards of behaviour and performance is maintained in the company's dealings with employees, customers, suppliers and all other stakeholders.

As part of this commitment, Klipspringer is a member of Sedex.

Sedex is an online platform that allows companies to share and manage supply chain information regarding labour standards, health and safety, the environment and business ethics. Klipspringer is registered as an B member on Sedex

Sedex membership No. ZC202532931.

Klipspringer supports the core principles put together by the U.K. Ethical Trading Initiative (ETI) that brings together companies, NGO's and trade unions, to ensure good working conditions wherever people are engaged in the supply of goods or services. The ETI is supported and part-funded by the U.K. government.

The main principles of the ETI baseline are:

1. Employment is freely chosen

There is no forced, bonded or involuntary prison labour.

Workers are not required to lodge "deposits" or their identity papers with their employer and are free to leave their employer after reasonable notice.

2. Freedom of association and the right to collective bargaining

Workers, without distinction, have the right to join or form trade unions of their own choosing and to bargain collectively. The employer adopts an open attitude towards the activities of trade unions and their organisational activities.

Workers' representatives are not discriminated against and have access to carry out their representative functions in the workplace.

Where the right to freedom of association and collective bargaining is restricted under law, the employer facilitates, and does not hinder, the development of parallel means for independent and free association and bargaining.

3. Working conditions are safe and hygienic

A safe and hygienic working environment shall be provided, bearing in mind the prevailing knowledge of the industry and of any specific hazards. Adequate steps shall be taken to prevent accidents and injury to health arising out of, associated with, or occurring in the course of the work, by minimising, so far as is reasonably practicable, the causes of hazards inherent in the working environment.

Workers shall receive regular and recorded health and safety training, and such training shall be prepared for new or reassigned workers.

Access to clean toilet facilities and to potable water, and, if appropriate, sanitary facilities for food storage shall be provided.

Accommodation, where provided, shall be clean, safe and meet the basic needs of the workers.

The company observing the code shall assign responsibility for health and safety to a senior management representative.

4. Child labour

There shall be no recruitment of child labour.

Companies shall develop or participate in and contribute to policies and programmes which provide for the transition of any child found to be performing child labour to enable him or her to attend and remain in quality education until no longer a child; “child” and “child labour” being defined below.

Children and young persons under 18 shall not be employed at night or in hazardous conditions.

Definitions:

Child: A child is any person less than 15 years of age unless local minimum age law stipulates a higher age for work or mandatory schooling, in which case the higher age shall apply. If, however local minimum age law is set at 14 years of age in accordance with developing country exceptions under ILO Convention No 138, the lower will apply.

Young person: Any worker over the age of a child as defined above or under the age of 18.

Child labour: any work by a child or young person younger than the age(s) specified in the above definitions, which does not comply with the provisions of the relevant ILO standards, and any work that is likely to be hazardous or to interfere with the child’s or young person’s health or physical, mental, spiritual, moral or social development.

5. Living wages are paid

Wages and benefits paid for a standard working week meet, at a minimum, national legal standards or industry benchmark standards, whichever is higher. In any event wages should always be enough to meet the basic needs and to provide some discretionary income.

All workers shall be provided with written and understandable information about their employment conditions in respect to wages before they enter employment and about the particulars of their wages for the pay period concerned each time that they are paid.

Deductions from wages as a disciplinary measure shall not be permitted nor shall any deductions from wages not provided for by national law be permitted without the expressed permission of the worker concerned. All disciplinary measures should be recorded.

6. Working hours are not excessive

Working hours comply with national laws and benchmark industry standards, whichever affords greater protection. In any event, workers shall not on a regular basis be required to work in excess of 48 hours per week and shall be provided with at least one day off for every 7-day period on average. Overtime shall be voluntary, shall not exceed 12 hours per week, shall not be demanded on a regular basis and shall always be compensated at a premium rate.

7. No discrimination is practised

There is no discrimination in hiring, compensation, access to training, promotion, termination or retirement based on race, caste, national origin, religion, age, disability, gender, marital status, sexual orientation, union membership or political affiliation.

8. Regular employment is provided

To every extent possible, work performed must be on the basis of a recognised employment relationship established through national law and practice.

Obligations to employees under labour or social security laws and regulations arising from the regular employment relationship shall not be avoided through the use of labour-only contracting, sub-contracting, or home working arrangements, or through apprenticeship schemes where there is no real intent to impart skills or provide regular employment, nor shall any such obligations be avoided through the excessive use of fixed-term contracts of employment.

9. No harsh or inhumane treatment

Physical abuse or discipline, the threat of physical abuse, sexual or other harassment and verbal abuse or other forms of intimidation shall be prohibited.

Klipspringer is kept up to date with current legislation with regards to Ethical matters via Government agencies. The minimum and national living wage is reviewed annually. An insurance broker acts on behalf of the company with regards to insurances, all of which are renewed annually. This is the responsibility of the Board of Directors.

Health & Safety and Environmental updates are communicated via the HSE, Health & Safety publications and general online guidance. It is the responsibility of the Health & Safety Manager to keep relevant personnel up to date with any changes.

We will review our employee and practices on a regular basis to ensure the principles as outlined above are being maintained.

Modern Slavery Act Company Policy Statement, QPO001 V4

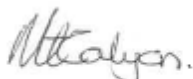

Klipspringer Ltd recognises the Modern Slavery Act 2015.

As a company we do not exceed the £36,000,000 threshold but confirm we will ensure that our company and its staff are aware of the requirements of the act, which are:

- It is illegal for anyone to hold another person as a slave or in servitude,
- It is illegal for anyone to be held as a slave or in servitude by another individual.
- It is illegal for anyone to require someone to perform forced or compulsory tasks or labour.
- It is illegal for someone else to force anyone to perform compulsory or forced tasks or labour.
- It is illegal to arrange or facilitate the travel of another person with the view that they will be exploited.

This policy forms part of the new staff induction programme and is accessible to all staff via our company intranet site.

Corporate Social Responsibility Policy, QPO007 V3

Scope

This CSR policy applies to Klipspringer Ltd. We also encourage our suppliers and partners to review their policies in this area.

Policy elements

We want to be a responsible business that meets the highest standards of ethics and professionalism. Our company's social responsibility falls under two categories: compliance and pro-activeness:

- Compliance refers to our company's commitment to legality and willingness to observe community values.
- Pro-activeness is to initiate the protection of human rights, our natural environment and help communities.

Compliance

Legality

Our company will:

- Respect the law
- Understand and consider the requirements of our customers
- Honour our internal policies
- Ensure that all its business operations are legitimate
- Keep every partnership and collaboration open and transparent

Business ethics

We'll always conduct business with integrity and respect to human rights. We will promote:

- Safety and fair dealing
- Respect towards customers and suppliers
- Anti-bribery and anti-corruption practices

Examples of Corporate Social Responsibility

- Reducing our carbon footprint
- Engaging in charity work and donating to local charities
- Reducing paper use and driving paperless processes, both internally and for our customers.

Pro-activeness

Preserving the environment

Apart from legal obligations, our company will proactively protect the environment.

Examples of relevant activities include:

- Recycling
- Conserving energy

Learning

We actively invest in R&D. We are open to suggestions and listen carefully to ideas. Our company will try to continuously improve the way it operates.

The company FBK has applied and passed all examinations necessary and is entitled to use the PHB logo with

Registration No. # DK-401

for all brushware by the company meeting the requirements of the Professional Hygiene Brushware Charter

This certificate is valid until the end of year 2024
Certificate approved by F.E.I.B.P.
December 2021

Andrew McIlroy
President

Separate Declarations of Compliance to 1935/2004/EC and 10/2011/EC are available via our website. It is the responsibility of the end user to review these certificates to ensure these products are suitable for the application required.

Detectable Products

The Klipspringer Detectable products, where highlighted within the Klipspringer product guide or website with the glass and fork symbol, are suitable for direct food contact.

Each item is made from detectable materials (*all will be metal detectable, and some will also be X-ray detectable*). Detectability of the items or parts of the item will be subject to the type of equipment and the sensitivity of the equipment used for detection. End users are recommended to evaluate the detectability of the item to ensure the smallest detectable piece size meets the sites needs to demonstrate the adequate due diligence required. It is the responsibility of the end user to review these certificates to ensure the products are suitable for the application required.

ESD Brushware and Tools

These Electrostatic discharge products are designed to be used in all types of hazardous environments where static charge is a concern.

All conductive products have been tested and proven to meet the following standard:

ESD TR53-01-06 Compliance verification of ESD protective equipment and materials ESD associated USA
ASTMD-257-78 Electrical resistance measurement methods of insulating materials CENELEC/TR 50404-2003
Electrostatics – Code of practice for the avoidance of hazards due to static electricity.

These products are not certified as suitable for contact with food. Specifications are available on request.

It is the responsibility of the end user to review these specifications to ensure the products are suitable for the application required.

Retreeva Global Detectable Pens and Marker Pens

Retreeva Global detectable pens are suitable to be used in a food environment. The pens are designed to offer both added prevention from damage and breakage as well detectability if damage is sustained. Pens are manufactured in a robust material which will bend rather than break and they offer superior performance, with over 10 Km of writing. The plastic is metal impregnated to give a good detection though both x-ray and metal detector of the whole or part of the pen. Specifications are available on request. Retreeva Global Pens are compliant with the BRC Global Food safety standard V8 in regard to clause 4.9.6.2 '*Pens used in open product areas shall be controlled to minimise the risk of physical contamination (e.g., designed without small parts and detectable by foreign-body detection equipment)*'. As they are designed to prevent breakage, are detectable and contain no small parts such as springs. They can also be IndeliMarked™ with unique numbering to make control much easier for sites.

Detectability of the items or parts of the item will be subject to the type of equipment and the sensitivity of the equipment used for detection. End users are recommended to evaluate the detectability of the item to ensure the smallest detectable piece size meets the sites needs to demonstrate the adequate due diligence required. It is the responsibility of the end user to review these certificates to ensure the pens are suitable for the application required.

IndeliMark™

This is a process that uses light frequencies via laser to change the molecular structure of the materials to produce an indelible permanent mark. Generally, marks can be made safely on metals and plastic items. To the best of our knowledge the process does not alter the food contact status of the material being marked. Marks where possible are smooth with minimal harbourage point and unless stated by the customer the marking is made on an area which will not be subjected to frequent food contact. IndeliMark™ can produce wording, numbers, sequential numbers, and logos in a contrasting colour to the item. It is the responsibility of the end user to review whether this process is suitable for their site and processes before implementing. Items IndeliMarked™ are not able to be returned for credit or replacement unless they are faulty.

Janitorial Equipment

Unless otherwise specified with the glass and fork symbol within the Klipspringer catalogue or website, most of these items are not suitable for contact with food. Where the glass and fork symbol is shown, declarations of compliance are available on request.

Wet Wipes

Unless otherwise stated within the Klipspringer catalogue or website, the majority of these products are suitable for indirect contact with food only, e.g., the active agent should be allowed to evaporate from the surface or be rinsed off with clean water before use.

Safety data sheets are available for each of these products on request.

It is the responsibility of the end user to review these data sheets to ensure the wipes are suitable for the application required.

Hygiene Clothing

All the hygiene clothing is suitable to be used in a food environment within a hygiene application.

Clothing has different ratings regarding chemical protection, specifications are available on request.

Items unless otherwise specified within the Klipspringer catalogue or website are not suitable for direct contact with food.

It is the responsibility of the end user to review these specifications to ensure the clothing is suitable for the intended application especially regarding health and safety and chemical resistance.

Processing Clothing

All processing equipment is suitable for use within a food or beverage manufacturing environment.

Items unless otherwise specified within the Klipspringer catalogue or website are not suitable for direct contact with food.

It is the responsibility of the end user to review these specifications to ensure the processing clothing is suitable for the intended application especially regarding potential foreign body contamination risks.

Shadow Boards

The boards are designed and manufactured on Klipspringer's site to customer's bespoke requirements and are therefore not eligible to return or credit unless due to damage or faults. Klipspringer does not print any design until the artwork has been formally approved by the customer. Where an issue is found with the design after approval, this is the responsibility of the customer although Klipspringer will offer all the assistance it can to try and rectify the situation.

The boards are suitable for food environments and occasional contact with diluted cleaning chemicals (at dilution rates specified by the chemical manufacturer).

Cleaning: Wipe over the surface of the board with a mild detergent and allow to dry. Non-abrasive cleaners or pads/scourers should be used. Damage to the boards laminate should be avoided.

Where through-board hooks are used, these can be removed for cleaning with a mild detergent. Where boards are magnetic, these should be removed from the wall so the reverse of the board and the wall can also be cleaned. Stainless steel frames can be cleaned with a mild detergent and a non-abrasive pad or scourer.

SegriScreens™ and SegriCovers

The screens can be supplied plain or can be printed with a customer bespoke design or message. Klipspringer does not print any design until the artwork has been formally approved by the customer.

Bespoke-produced SegriScreens and SegriCovers cannot be returned for credit unless due to damage in transit or faults. Where an issue is found with the bespoke design after approval, this is the responsibility of the customer although Klipspringer will offer all the assistance it can to try to rectify the situation.

The SegriScreens™ and SegriCovers are suitable for use in most manufacturing environments, including food manufacturing. Environments which include fire or sparks which may damage the fabric are to be avoided.

Cleaning: Wipe over the surface of the screen with a mild detergent and if being removed from the frame for storage, allow time to fully dry first. Non-abrasive cleaners or pads/scourers should be used for stubborn marks.

Damage to the surface of screen should be avoided. Replacement screens can be purchased. Stainless steel frames can be cleaned with a mild detergent and a non-abrasive pad or scourer.
