---

**Why use SegriScreen:**
- Creates a continuous barrier.
- Flexible (not limited to straight lines).
- Modular system.
- Easy to move.
- Neat for storage and transportation.
- Stainless steel frame and base units.
- Waterproof.
- Food factory friendly - no stitching.
- Bespoke printed (optional).
- Individually serial numbered.
- Replaceable screen component.
- Available from stock for quick delivery.
- Delivered flat-packed and easy to assemble.

**Available in 5 colours:**
- WT
- BL
- RD
- YL
- GN

**Choose from 3 options:**
1. **SegriScreen**
   - The original SegriScreen. For applications where individual screens are required.
2. **SegriScreen PLUS**
   - For applications where additional height is needed. SegriScreen Plus is 450mm taller than the original SegriScreen - excellent for preventing overspray.
3. **SegriScreen X-TEND**
   - Klipspringer’s unique, patent pending barrier system. Connect multiple SegriScreen X-Tends together to create a continuous, waterproof or human barrier.

**The benefits:**
- Improve segregation
- Reduce cross-contamination
- Reduce downtime
- Increase production efficiency
- Support best practice

**Available in 5 colours:**
- WT
- BL
- RD
- YL
- GN

Please provide details of bespoke requirements.

Over 7,000 ISO 7010:2011 compliant signs available - seven different materials, in nearly thirty sizes.

All 5 categories of safety sign available within 72 hours.

3 simple steps to selecting the right sign...

1. Select Design
   Use the catalogue contents or index to locate the required design and the corresponding four digit design code (e.g. 5216).

2. Select Material
   Choose the best material for application and add the relevant digit to the front of the required design code (e.g. 1 5216).

3. Select Size
   Select the size you require and add the corresponding letter to your code (e.g. 1 5216 A).

Take traceability to the next level...

Klipspringer’s leading indelible marking service offers extensive opportunities to protect ownership, ensure traceability and provide the ultimate means of accountability.

IndeliMarking avoids physical impact on hygiene surfaces by changing the molecular structure of the article’s material, avoiding the risk of compromising hygiene. Compatible materials include plastics, nylon and stainless steel.

Why choose Indelimark?
• Reduce unnecessary losses
• Increase accountability
• Enhance traceability

For compatible products look out for the Indelimark symbol throughout this product guide.

Please provide details required when placing your order. The process is undertaken by trained staff, with a lead time of 3-5 days.
