Instrument Stations

Engender a culture of care

klipspringer.com
Instrument stations

Over 75% of damage reported with probe thermometers can be avoided with correct handling and storage*. 

Why use Instrument Stations?

- **Reduce downtime.** Storing each thermometer in a known location ensures that it can be instantly located when required.
- **Reduce repair costs.** Safe and proper storage of probe thermometers when not in use significantly reduces mishaps.
- **Engender a culture of care and ownership.** When operators become accountable for correct storage of instrumentation, replacement and repair costs are significantly reduced.
- **Improve segregation and awareness.** Reinforce colour coding policies, highlight areas and special instructions by adding title and footnotes to instrument stations.
- **5S and lean management.** Instrument stations support 5S and lean management concepts simply and effectively. Introduction of bespoke installations has impressed auditors at every level.

*Statement based on over 10 years accumulated study of instrument sent for service and repair.
