The number of people in the UK suffering from allergic reactions continues to increase year-on-year at a rate of 5%, with children representing around 50% of these disturbing statistics. It is inevitable this subject regularly hits the headlines.

Our infographic shows some of the astonishing facts that may come as an unwelcome surprise...

- **615%** increase in hospital admissions for anaphylaxis in 20 years, 1992-2012 (Turner et al, JACI, 2015)
- **150 MILLION** people have allergies in Europe, the most common chronic disease (EAACI, 2014)
- **6-8%** children have a proven food allergy (National Institute for Health and Clinical Excellence, 2011)
- **500%** increase in hospital admissions for anaphylaxis in 20 years, 1992-2012 (Turner et al, JACI, 2015)
- **3,500+** combinations of type, size and colour foodgrade utensils – something for every application
- **10 2** MORE THAN 3500
